

The Traveling Salesman Problem

The Traveling Salesman Problem is one of the most intensively studied problems in computational mathematics. These pages are devoted to the history, applications, and current research of this challenge of finding the shortest route visiting each member of a collection of locations and returning to your starting point.

How to solve the TSP! (YouTube), TSP cutting-plane method (YouTube or as mov)

Search Site

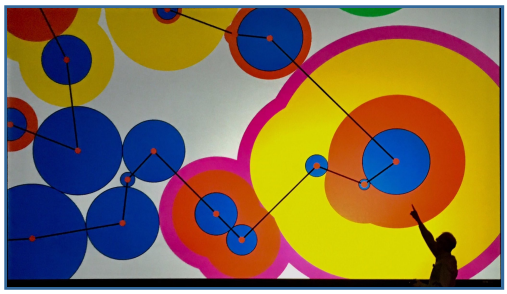

Optimal crawl to 49,687 pubs in the UK.

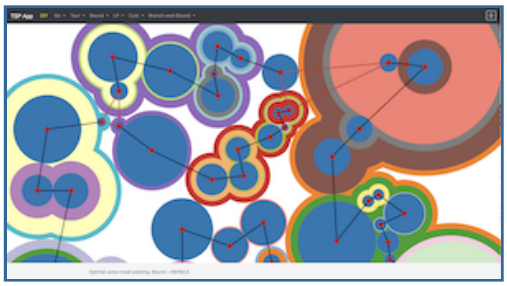

How to visit 1.33 billion stars.

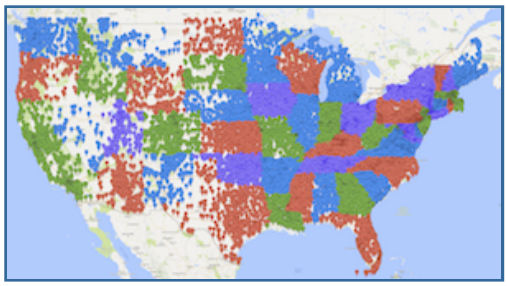

TSP: Postcards from the edge of Impossiblity
IFORS Distinguished Lecture
EURO 2019, Dublin

Connecting the Dots in the TSP
MAA Invited Address
2018 Joint Math Meetings

Traveling Salesman Problem DIY
Web app for learning/teaching TSP solution methods.

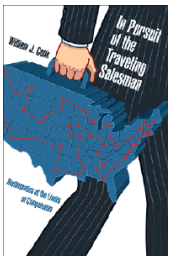

Visit 49,603 historic sites in the US.

49,693 Historic Sites	Optimal walking tour through the USA
TSP Tutorial in Python	Nice intro to the TSP by Peter Norvig
Pokemon Go Tours	Shortest routes to Catch 'em All
Tour for Extra Milers	Drive to all 3100 US county seats
Queen of College Tours	Optimal road trip to visit 647 colleges
Hiking Tour of Austria	Get a view of 100 mountain peaks
50 USA Landmarks	Dicussion of wildly popular USA tour

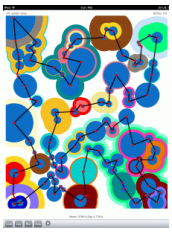

Scientific American	Short piece on Yogi Berra and the TSP
Travelling Salesman	Thriller movie centered around a solution of the TSP
Mona Lisa TSP	$1,000 Prize for a 100,000-city challenge problem.
pla85900	Solution of a 85,900-city TSP.
Iowa Tour	Optimal route for a 99-county campaign tour.

Pursuit

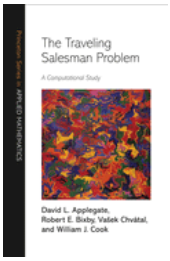

In Pursuit of the Traveling Salesman: Mathematics and the Limits of Computation, available for $14.27 @ Amazon. News items can be found on the book's Facebook Page.

iPhone/iPad App

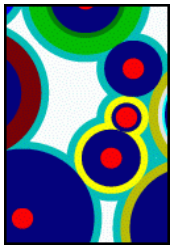

Concorde TSP app for the iPhone and iPad avaiable on the Apple App Store. It's free!

Computation

The Traveling Salesman Problem: A Computational Study by Applegate, Bixby, Chvatal, and Cook.

Lower Bounds

Description of the techniques we use to compute lower bounds on the lengths of all TSP tours.

Sweden TSP

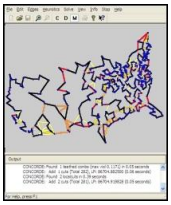

Optimal solution for visiting all 24,978 cities in Sweden. Tour has length approximately 72,500 kilometers.

Car 54

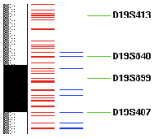

The TSP was featured in a contest run by Proctor and Gamble in 1962. The challenge problem had 33 cities.

Concorde for Windows

A graphical user interface available for Concorde on Windows' platforms.

Genome

The Concorde TSP solver is used in a genome sequencing package from the National Institutes of Health.

National TSPs

A collection of 25 TSP challenge problems consisting of cities in Argentina through Zimbabwe.

TSP History

Pages describing some of the history of the TSP as a mathematical and computational challenge.

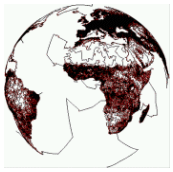

TSP Game

A flash game to find the optimal tour through a randomly generated set of city locations.

World TSP

A challenge problem consisting of the locations of 1,904,711 cities throughout the world.

The work described here is supported by the Natural Sciences and Engineering Research Council of Canada (NSERC) and the Department of Combinatorics and Optimization at the University of Waterloo.
