Importance: High

Hi, Meshaal,

Please follow the simple research project to continue your research: GVD+TSP+WDA…

Please read the attached files. You only need to use your Miller-Tucker-Zemlin based TSP to replace PSO-based, HNN-based, and Tabu-based TSP models in these attached papers.

I am not sure why it is hard.

What you only need to do is to replace PSO-based, HNN-based, and Tabu-based TSP models in these attached papers by your Miller-Tucker-Zemlin based TSP model and use GVD as global path planner.

It is nearly a conference paper ready. Please let me know if you have any questions.

Best wishes!

Dr. Luo
